Dock - by Erik Munnikhof

Erik Munnikhof

De ontwerpen van Erik Munnikhof kenmerken zich door een heldere, leesbare vormtaal. Geometrie, symmetrie en interessante technische principes zijn terugkerende elementen in zijn ontwerpen. Erik zoekt altijd naar, zoals hij het zelf zegt, “de optimale mix van esthetica, ergonomie, ecologie, economie, constructie en functionaliteit.” Erik haalde met deze exclusieve lijn deur- en raambeslag de erkenning “Goed Industrieel Ontwerp” en de “Special Award for Excellence” voor functionaliteit. Deze Dock lijn is modulair opgebouwd waardoor u kunt kiezen tussen bijvoorbeeld de warme uitstraling van notenhout, de moderne look van RVS of de prettige feel van kunststof.

2015:
GOED INDUSTRIEEL
ONTWERP

The designs of Erik Munnikhof are characterized by a clean design. Geometry, symmetry and interesting technical principles are recurring elements in his designs. Erik is always looking for, as he puts it, “the optimal mix of aesthetics, ergonomics, ecology, economics, design and functionality.” For this exclusive line door and window handles, Erik received the reward “Good Industrial Design” and the “Special Award for Excellence” for functionality. This Dock line is modular so you can choose between the warmth of walnut, the modern look of stainless steel or the soft feel of synthetic material.
